

# Office

## Securing your workplace

We can deliver the ultimate interactive system to fit any office space. Whether securing multi-tenancy buildings and car parks or controlling staff access; we'll tailor the ideal solution.

### Security and video with ProControl+

Control your entire system remotely via ProControl+; access security and video in one app to arm and disarm, or check what's happening. You can even check the system history to monitor staff activity.

### Full video verification

Linking security devices such as internal or external detectors with cameras delivers video verification of system activity via ProControl+; alerting and showing you what's happening, so that appropriate action can be taken.

### Compatible with professional 24/7 monitoring

Alongside the ability to monitor remotely via ProControl+, the system can be connected to your local alarm receiving centre (ARC) for professional 24/7 monitoring and response.

### Full and separate area control

Arm and disarm the entire office or specific areas; supply staff with convenient, easy-to-use tags and/or ProControl+ access as required. This is ideal where restricting employee access to certain offices is necessary, as well as for multi-tenancy office spaces where separate access is required.

## Enforcer V10

A multi-award-winning control panel that delivers a quick, non-invasive fully wireless installation, full remote ProControl+ functions and the ability to wire in devices if required.

## Euro 46 V10

A hybrid control panel that delivers a wired installation, with wireless expansion capabilities to deliver a tailored system with full remote ProControl+ functions.

## Magnetic contact

Device with two parts that notifies the system when separated – ideal for use on windows, doors and hatches.

## Confirmation detector

Comprised of both a PIR and a dual-technology detector in a single housing, independently they work together to confirm an intrusion – excellent for small rooms where confirmation is required but too small for two individual detectors

## Volumetric coverage PIR

Monitors a 12m radius volumetric area for body heat – perfect for indoor rooms and spaces.

## Shock sensor

Detects vibrations on the surface it is affixed to - suited to windows and other vulnerable entry points.

## ProControl+

Integrating video and intruder systems in one app to provide complete control over security systems.

## Proximity tags

Easy to add, edit and delete, these can be simultaneously used for arming, disarming and door access.
